

# The Great Road Trip

## April – July 2022

### Driving for a Cure

**The Great Road Trip** is a transcontinental journey from Los Angeles to Rome in a refurbished 35-year old, 29-horsepower Citroen 2CV. The 2CV, affectionately known as the “Tin Snail”, was manufactured from 1948-1990 and is a cult car in Europe. The total distance driven will be 4,300 miles in the U.S. and Canada, and 2,300 miles in the UK and Europe.

Volunteer drivers and passengers from the KD community, along with Citroen car clubs and other car enthusiasts are welcome to participate. You can drive or ride in the 2CV or tag along in your own vehicle. This will be a truly epic adventure for a very good cause.

Donations are welcome. Sponsorships are available.

 18 May **Rest / Media day in Philadelphia**  
 19 May Philadelphia =====> **New York** (NY)  
 20 May **Media Events in New York**

#### What is Kennedy's Disease?

Kennedy's Disease (KD), or Spinal and Bulbar Muscular Atrophy (SBMA), is an inherited, adult-onset neuromuscular disease that affects primarily men. KD causes progressive muscular weakness, especially noticeable in the legs, arms, and facial regions. This results in deteriorating ability to walk, speak, swallow, and perform other basic life functions. The muscle weakness can result in aspiration pneumonia and falls that can lead to serious complications and death.

#### Can Kennedy's Disease be Cured?

While there is currently no cure or treatment for KD, research has suggested several possible pathways that may lead to a treatment. Research continues and it needs your support. The purpose of **The Great Road Trip** is to raise awareness of Kennedy's Disease and to raise much-needed funds for the US and European research programs.
